

30-Day JavaScript Learning Challenge

A daily content & study plan for learning JavaScript in public

This plan breaks JavaScript into 30 daily topics, grouped into four weekly themes: Fundamentals, Functions & Scope, Arrays/Objects & Modern JS, and DOM/Events/Async. Each day should be published as a short post following the 8-part structure below — consistency matters more than length, so keep every post focused on one concept.

Week 1 — Fundamentals

Day	Topic
1	var, let, const
2	Data Types
3	Operators
4	Type Conversion & Coercion
5	if, else, else if
6	switch
7	for, while, do...while

Week 2 — Functions & Scope

Day	Topic
8	Functions
9	Function Parameters & Return
10	Arrow Functions
11	Scope
12	Hoisting
13	Closures
14	Recursion

Week 3 — Arrays, Objects & Modern JS

Day	Topic
15	Arrays
16	Array Methods — map(), filter(), reduce()

17	More Array Methods — find(), some(), every()
18	Strings & String Methods
19	Objects
20	Object Methods & Destructuring
21	Spread & Rest Operators

Week 4 — DOM, Events & Async

Day	Topic
22	Template Literals
23	DOM Basics
24	DOM Manipulation
25	Events & Event Listeners
26	Forms & Form Validation
27	JSON & Local Storage
28	Promises
29	async/await & Fetch API
30	Mini JavaScript Project + What I Learned

Daily Post Structure

Use this same 8-part structure for every day of the challenge, no matter the topic. It keeps posts predictable for readers and makes them easy to write quickly.

1. Today's Concept

Name the topic in one line — what are you covering today?

2. Simple Explanation

Explain it in plain language, avoiding heavy jargon. Aim for a beginner to follow along.

3. Why It Matters

Connect the concept to real-world use — where and why developers actually use it.

4. Code Example

Share a short, focused code snippet that demonstrates the concept clearly.

5. Output

Show what the code produces when run, so readers can verify their understanding.

6. One Important Point / Common Mistake

Call out a gotcha, edge case, or mistake beginners often make with this topic.

7. Small Practice Challenge

Give readers one small task to try on their own before the next post.

8. Your Learning Journey

Add a personal note — what felt easy, what felt hard, and how it's going for you today.

Tips for Staying Consistent

- Write tomorrow's post outline right after finishing today's — momentum is easier to keep than to restart.
- Keep code examples under 15 lines where possible; clarity beats cleverness.
- Reuse the same visual format/template each day so your series is instantly recognizable.
- If you skip a day, don't restart the count — just continue and mention it briefly in the next post.
- On Day 30, link back to Day 1 and summarize the full journey — this is your most shareable post.
